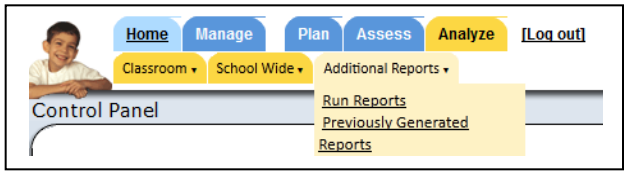
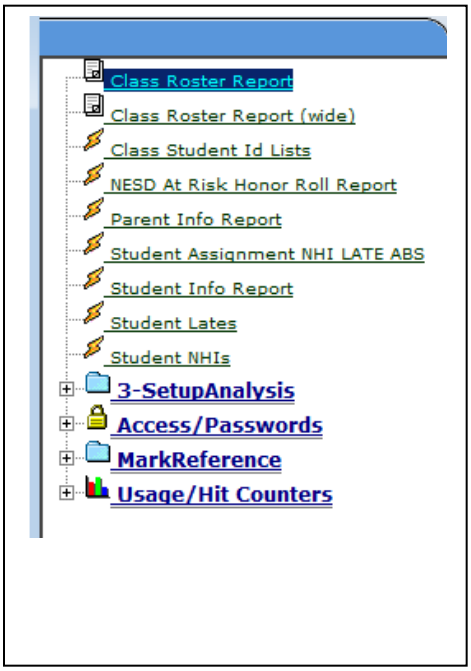
Incomplete Assignment Reports in StudentsAchieve

Several "older" type reports are available to view which students have not completed assignments. For these reports to function properly the completion code needs to be identified.

Step 1: From the Home screen select Analyze > Additional Reports > Run Reports



Step 2: Select the report of choice



Report Descriptions

Student Assignment NHI LATE ABS

This report shows the number of NHI, LATE, and ABS assignments as identified by the completion codes. The report unfortunately does not show the names of the assignments. It is simply a count.

Student NHIs

This report may be a better choice. It does display the the assignment name.

Note: These reports are old, and it is anticipated that better reports will be made available in the future.
