We have developed lesson plans for Potash in Grade 4 Rocks, Minerals and Erosion , Grade 7 Earth's Crust and Resources, Grade 7 Mixtures and Solutions, and Chemistry 30 Solubility and Solutions (draft). The lesson plans can be downloaded from the website (<http://www.saskmining.ca/news-article/Education-Outreach/For+Schools/Education+Resources/1/2011-06-09-posters.html>).

We are in the process of developing kits to accompany the potash lesson plans. Kits are currently available through workshops. We hope to have them available through the School Division Science Consultants in the fall.

We also have a collection of general lesson plans (Mining 4 Society Teacher Resource) following the cycle of mining from exploration to products and careers.

All of our resources have been correlated to the new Science curriculum and in some cases to the Social Studies curriculum.

We are continuing to develop lesson plans with teachers and members of the mining industry. Keep checking our webpage for updates.
